

EDAP Announces CEO Succession Plan, Board Appointment

Marc Oczachowski to Assume CEO Role

Hugues de Bantel to Join Board with Focus on French and US Programs

Lyon, France, December 19, 2006 - EDAP TMS S.A. (NASDAQ: **EDAP**), the global leader in High Intensity Focused Ultrasound (HIFU) treatment of prostate cancer, announces the appointment of Chief Operating Officer Marc Oczachowski to the post of Chief Executive Officer. Hugues de Bantel will leave his post as CEO to pursue personal interests but will join the company's Board of Directors to assist with strategic programs. The CEO transition and Board appointment will take effect on March 31, 2007, allowing for a smooth transition.

EDAP Chairman Philippe Chauveau stated, "We are pleased to announce a direct and smooth succession program for EDAP's senior management team. As Chief Operating Officer, Marc Oczachowski oversaw a significant gain in cost controls and most recently directed the launch of our successful and growing marketing efforts bringing Ablatherm-HIFU to the forefront of prostate cancer care in Europe. He is also the chief driver of our industry leading RPP program. I will be pleased to welcome Hugues de Bantel to the Board of Directors for EDAP TMS where he will continue to serve shareholders. This elevation to the Board will reflect his success as CEO as well as provide for expertise in key programs such as entering the US market and securing French reimbursement."

Oczachowski joined EDAP in 1997 as Area Sales Manager, based in Lyon, France. From March 2001 to January 2004, he successfully developed EDAP's position in Asia as General Manager for Southeast Asia. He was appointed COO in November 2004. Previously he worked for Soderm Systems, a worldwide leader in orthopedics devices, and is a graduate of Institut Commercial de Lyon, France.

Oczachowski stated, "I am ready to step into the Chief Executive role to drive our strategic plan to expand the HIFU business in key European countries where growth is expected and already occurring. I am pleased Hugues is committed to supporting the Company at the Board level on strategic issues. Also, with Eric Soyer joining the top management team, we will successfully execute the strategy while increasing EDAP's visibility for investors and shareholders."

"I have enjoyed leading EDAP as its CEO very much for these past years," said de Bantel. "I am pleased to be offered a seat at the Board as it provides me the opportunity to share my experience in the business. I am fully in line with the Board's strategy to focus on expanding the HIFU business in key European growing countries, while strongly addressing strategic items such as US market entry and reimbursement."

The CEO and Board succession complements the recently announced appointment of Eric Soyer to Chief Financial Officer to address EDAP's multinational growth programs. The company is also adding sales positions in key countries experiencing rapid growth in Ablatherm-HIFU interest as recently announced.

Eric Soyer commented, "I am very excited about the potential of EDAP and the opportunity to assist Marc in developing EDAP's business and visibility. EDAP is today well capitalized to invest in the growth programs necessary to make HIFU a new standard in prostate cancer care based on proven outcomes. I look forward to liaising regularly with our shareholders and investors as we report our progress as the leading provider of HIFU for prostate cancer."

About EDAP TMS S.A.

EDAP TMS S.A. develops and markets Ablatherm, the most advanced and clinically proven choice for High Intensity Focused Ultrasound (HIFU) treatment of localized prostate cancer. HIFU treatment is shown to be a minimally invasive and effective treatment option with a low occurrence of side effects. Ablatherm-HIFU is generally recommended for patients with localized prostate cancer (stages T1-T2) who are not candidates for surgery or who prefer an alternative option, or for patients who failed radiotherapy treatment. The company is also developing this technology for the potential treatment of certain other types of tumors. EDAP TMS S.A. also produces and commercializes medical equipment for treatment of urinary tract stones using Extra-corporeal Shockwave Lithotripsy (ESWL).
